

## Environmental Policy

### 1. THE AIM OF THE POLICY

- i. To set guiding principles for all activities and establish processes and procedures to meet and where possible exceed relevant environmental statutory requirements and our clients expectations.
- ii. Provide the frameworks for setting and reviewing environmental objectives and targets; which are documented, implemented, maintained and communicated to all employees and available to stakeholders.
- iii. To comply with AS/NZS ISO 14001:2015.

### 2. THE COMPANY'S ENVIRONMENTAL GOALS & OBJECTIVES

- iv. Eliminate, reduce or control actual and potential adverse impacts on the environment.
- v. Minimise waste production and divert waste away from landfill by promoting resource efficiency, recycling, and the use of recycled and recyclable materials.
- vi. Prevent pollution arising from the storage, handling and disposal of waste.
- vii. Prevent nuisance pollution such as noise, dust and smoke.
- viii. Protect and preserve natural habitats, flora and fauna.
- ix. Promote communication about environmental management as a normal part of all aspects of work.
- x. Ensure environmental awareness and encourage respect for the environment by all staff, subcontractors and suppliers
- xi. Develop, implement and maintain a management system that complies with AS/NZS ISO 14001:2015.

### 3. THE COMPANY'S COMMITMENT

- i. ATG is committed to integrating sustainable workplace practices into our construction activities in order to continually improve our environmental performance and environmental management system.
- ii. ATG will strongly promote and drive participation and consultation processes throughout all levels of the business. ATG expects these processes, along with HSEQ site inspections and audits to be a major influence in minimising adverse environmental impacts through the process of joint consultation.
- iii. It is a requirement of ATG that annual environmental objectives shall be set for all states by the HSEQ leadership committee. These objectives shall be reviewed regularly to address the environmental requirements and concerns of client companies as well as the community. As improved levels of performance are achieved, goals are then set for further improvement.
